Jingcheng QY55H3 Truck Crane (55Ton; YOM 2013)

Key Specification

Manufacturer: Jingcheng Heavy Industries
Type: Truck Crane, Mobile Crane
Chassis: 4 Axles (Truck Chassis)
Condition: Used - Ready for work
(Regular Greased and Serviced)

Boom Tip & Sheaves

The boom head shows a well aligned multi-sheaves system. The wire rope tracking is entered, and the sheave grooves show consistent wear, indicating the crane has not been over stressed on single-line pulls.

Lattice Jib Included.

Main Lift Cylinder

The large hydraulic ram shows a clean, polished chrome surface. The absence of deep scoring or "pitting" on the rod ensures a tight seal and consistent holding power without drifting under load.

Jingcheng QY55H3 Truck Crane (55Ton; YOM 2013)

Intuitive Cabin

All primary analog gauges are intact, and the PTO engagement switches are clearly marked and functional.

Heavy Duty Suspension

The leaf spring setup is in solid condition. The springs show no sign of flattening or "fanning out", proving the chassis still has excellent load-carrying capacity for road travel.

The tires features deep, aggressive tread patterns, essential for maintaining traction on unpaved construction site in wet condition.
