Liebherr LTM 1350-6.1 Mobile Crane (350Ton; YOM 2012)

Slewing Ring Gear

Large rotational bearing and gear teeth are well greased and free from chipping or excessive wear. The mounting flange remains tight with no cracks or loose bolt. Smooth operation expected with no structural damage visible.

Slewing Drive Unit

Gearbox, motor and meshing pinion are clean and properly lubricated. The hydraulic connections are secure with no leaks. Components show only normal wear- no damage or failure sign.

Hydraulic Cylinder & Manifolds

Lift cylinder, valves and piping are intact with no scored rods or damaged seals. Fittings are tight; no heavy oil staining or corrosion. All critical hydraulic parts appear well serviced and reliable.
